

Uber Residence

This 850 sq.ft. apartment proves thoughtful design can create a safe, comfortable haven for seniors. Prioritising their needs, the interiors promote ease of use while feeling warm and inviting.

Gone are slippery tiles, replaced with senior-friendly flooring to minimise falls. This sets the foundation for a secure living environment.

Light and airy defines the space. A white and neutral palette makes rooms feel more spacious, while clever half-wall paint adds a touch of visual interest.

Woodwork boasts textured grooves and rounded edges for safety. Green furniture complements the neutrals, creating a subtle connection to the lush greenery outdoor. Strategically placed teak grab bars blend seamlessly, aiding navigation.

The master bedroom prioritises ease of movement for the senior couple. A compact design with a sliding glass wardrobe creates a sense of spaciousness while maintaining a calming neutral palette. The bathroom underwent a complete transformation, prioritising safety and functionality. Swing doors were replaced with space-saving sliding doors, and shower benches were installed for comfortable bathing. Integrated grab bars throughout the bathroom offer additional support and peace of mind.

The second bedroom transforms into a versatile haven. Functioning as a study, media room, and guest room, it features a wall-mounted fold-away bed that creates space for a comfortable tan leather sofa when not in use, perfect for relaxing movie nights.

The kitchen exemplifies functionality. Lowered work surfaces prevent back strain, and a built-in chair provides comfort while cooking. This Bangalore apartment proves senior-friendly design can be stylish and welcoming, prioritising safety and comfort without sacrificing personal touches.
